How It Works

For Clinic

1. Check if patient had PID or ABHA ID
2. Create / Update patients basic information
3. Start visit and capture vitals
4. Patient wait for the doctor
5. Doctor checks patient history and does examination
6. Doctor conducts diagnosis
7. Doctor provides medication
8. Print visit report and medication list

For Patients

1. Patient visits Clinic
2. Patient Scans QR code at the Clinic on PHR App
3. Clinic gets patient info
4. Clinic sends Consent request to access medical history
5. Doctor views the medical history
6. Treatment and prescription details sent on their mobile
7. Patients can store health records in a health locker
